Hi, we are Morgan Sindall and we have been appointed to build the primary element of Ysgol Bro Taf the new 3-16 school in Cilfynydd, as well as create a new 3G pitch and increase the on site parking, drop off and pick up facilities. The project is due to run over 54 weeks with overall completion of the project in Summer 2024.

New School

The Images to the right shows digital shots of how the school will look. Externally there will be a new 3G pitch with additional parking areas and a bus drop off. Internally there will be classrooms to cater for the different school years, a hall, kitchen and an internal courtyard.

The school will be Net Zero Carbon incorporating many technologies such as Photovoltaics, Air Source Heat Pumps and Electric Vehicle charging.

Progress

The photos at the bottom show recent site activity. We are currently in week 6 of 54 and have undertaken the demolition of the existing block, stripping out the internal walls and ceiling back to the steel frame and roof structure. In the coming weeks we'll be forming the internal drainage and forming the openings for the new windows and doors. We'll also be starting on the 3G pitch and bus drop off area.

Community Benefits:

We are committed to delivering many benefits for the local community during our time on this project.

We will also work closely with both Cilfynydd Primary School and Pontypridd High School to educate pupils about the construction process and raise their awareness of opportunities within the construction industry.
